

## **Molok North America Ltd. Ranks No. 364 on the 2013 PROFIT 500**

*PROFIT Magazine unveils 25<sup>th</sup> annual list of Canada's Fastest-Growing Companies*

**Mount Forest, Ontario (June 3, 2013)** - PROFIT Magazine today ranked Molok North America Ltd. No. 364 on the 25<sup>th</sup> annual PROFIT 500, the definitive ranking of Canada's Fastest-Growing Companies. Published in the Summer issue of PROFIT Magazine and online at PROFITguide.com, the PROFIT 500 ranks Canadian businesses by their revenue growth over five years.

Molok North America Ltd. made the PROFIT 500 list with five-year revenue growth of 127%.

“To celebrate the 25<sup>th</sup> anniversary of the Fastest-Growing Companies in Canada, the PROFIT 500 has expanded to recognize the entrepreneurial achievements of more than 500 Canadian companies,” says Ian Portsmouth, Editor-in-Chief of PROFIT Magazine. “PROFIT is proud to now showcase Canada's forward-thinking small business entrepreneurs and honour their talents and innovations.”

For Molok North America Ltd. being in the incredible group of PROFIT 500 is an enormous honor. President and CEO Marja Hillis expresses her gratitude by saying: “I feel like I'm at the Academy Awards ceremony receiving an Oscar and trying to fit all the people in my short speech whom I want to thank for making this possible. It is an impossible task as there is a countless number of individuals, organizations and other partners who have worked with us in achieving the growth we are seeing now and in the future. A special thanks goes to our incredible staff – I couldn't ask for a better crew – they simply make my job a pleasure every day!”

The Molok® Deep Collection™ system is an environmentally friendly, new generation waste solution. Developed with the end user in mind, the system offers a clean, effective and efficient collection point for a variety of waste types. The container's vertical, semi-underground design allows the waste to compact, increasing the container capacity, and the lower temperatures underground prevent odours and pests. What makes Molok® stand out is the unique emptying method. Molok® containers are emptied through the bottom of a reusable lifting liner using a hydraulic arm. This emptying technique offers key benefits not available with conventional containers. Because waste is being lifted out instead of being tipped, the insect attracting and smelly drippings of waste that come with the tipping method are non-existent. The Molok® emptying system keeps the container, user lid and surroundings clean. During the emptying process, the main well is never moved. This allows for more flexibility with site placement. Molok® containers can be placed behind shrubs, sidewalks, fences, even in tight spaces. This is because the collection vehicle does not have to approach the containers from any specific direction. Additionally, Molok® containers can be surrounded with landscaping, pavement or whatever suits your taste.

The Molok® Family offers an array of container sizes that can be used to capture waste, recyclables, organics, used cooking oil, and even used clothes.
