

**Molok North America Ltd. Ranks on the 2015 PROFIT 500
for the Third Year in a Row**

– *PROFIT magazine unveils 27th annual list of Canada's Fastest-Growing Companies* –

Mount Forest, Ontario (September 17, 2015) Canadian Business and PROFIT today ranked Molok North America Ltd. No. 279 overall on the 27th annual PROFIT 500, the definitive ranking of Canada's Fastest-Growing Companies, and ranked No. 45 in the manufacturing category. Published in the October issue of *Canadian Business* and at PROFITguide.com, the PROFIT 500 ranks Canadian businesses by their five-year revenue growth.

Molok North America Ltd. made the 2015 PROFIT 500 list with five-year revenue growth of 206%.

"The PROFIT 500 represent the highest tier of entrepreneurialism in Canada," says James Cowan, Editor-in-chief of PROFIT and Canadian Business. "They should be lauded for the positive economic contributions they've made to their communities—and the entire country. They are examples of what can be accomplished with innovation, discipline and determination."

"Molok North America Ltd. is honoured to be on the PROFIT 500 ranking for the third year in a row," says CEO Marja Hillis. "This achievement reflects the strength of our product and the dedication of our team."

The Molok[®] Deep Collection[™] system is the original semi-underground waste solution. Developed with the end user in mind, the system offers a clean, effective and efficient collection point for a variety of waste types. The container's vertical, semi-underground design allows the waste to compact, increasing the container capacity, and the lower temperatures underground prevent odours and pests. What makes Molok[®] stand out is the emptying method. Molok[®] containers are emptied through the bottom of a reusable lifting liner using a hydraulic arm. This emptying technique offers key benefits not available with conventional containers. Because waste is being lifted out instead of being tipped, the insect attracting and smelly drippings of waste that come with the tipping method are non-existent. The Molok[®] emptying system keeps the container, user lid and surroundings clean. During the emptying process, the main well is never moved. This allows for more flexibility with site placement. Molok[®] containers can be placed behind shrubs, sidewalks, fences, even in tight spaces. This is because the collection vehicle does not have to approach the containers from any specific direction. Additionally, Molok[®] containers can be surrounded with landscaping, pavement or whatever suits your taste.

About Molok North America Ltd.

Headquartered in Mount Forest, Ontario, Molok North America Ltd. provides commercial, residential and municipal applications with an innovative new way of managing waste and recyclables. Molok® Deep Collection™ containers have vertical, semi-underground design. This design allows the waste to compact, increasing container capacity, and the lower temperatures underground prevent odours and pests. What makes Molok® stand out is the emptying method. Containers are emptied through the bottom of a reusable lifting liner through the use of a crane, a method that offers key benefits not available with conventional containers. Developed with the end user in mind, the Molok® Deep Collection™ system provides a collection point that is safe, efficient and easy to use for everyone.
