REVOLUTIONIZING Clothing Collection

A cleaner, safer and more efficient method for collecting clothing donations.

Molok® Deep Collection™ containers offer an **efficient and effective** solution to issues often associated with clothing collection.

WE OFFER A SOLUTION!

- SAFE
- CLEAN
- SECURE

ISSUE: *Finding an ideal location*

SOLUTION: Molok® containers have an attractive appearance and can be placed in high visibility locations, naturally deterring theft attempts. Landscaping options make the area more appealing, thereby encouraging donations.

ISSUE: *Safety*

SOLUTION: Molok® containers' design and opening height deter theft while ensuring maximum user safety.

ISSUE: *Bins fill up quickly, resulting in overflow*

SOLUTION: Molok® containers have natural vertical compaction and hold significantly larger volumes of donated clothing.

ISSUE: *Damage to donations or bins*

SOLUTION: Permanently installed Molok® containers are durable and secure. They cannot be tipped over or stolen. Manufactured only of quality materials, they are designed to last decades. Donated items stay clean and dry.

ISSUE: *Municipal Approval*

SOLUTION: Municipal approvals for the installation of Molok® containers is straight forward. We offer a clean and attractive alternative to conventional options.

- 👍 The innovative design makes containers safe for all users, public and collection staff.
- 👍 Container keeps items secure and protected, deterring vandals.
- 👍 Easily used by persons of all ages and abilities.

**Less Frequent
Collection**

GREAT
BENEFIT

Less time is spent emptying a Molok® container compared to a conventional clothing bin. One Molok® container can be emptied in 4 minutes or less, where conventional bins can require up to 35 minutes to empty.

How
our system
is revolutionary

Convenient, safe
and space-saving
semi-underground
collection

The Molok® Deep Collection™ system was created and developed by Veikko Salli in the 1980's in Finland. Since that time, Molok® containers have spread across the globe and are now in over 40 countries worldwide. Molok North America Ltd. has been in operation since 1999 and is headquartered in Mount Forest, Ontario.
