

# North American Bear-Resistant Products Testing Program

## Official Test Results

---

**Test File #** 19-10

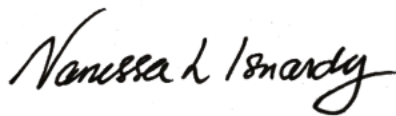

**Testing Date:** August 1, 2019

**Product Supplier:** Molok North America

We are pleased to inform you that on August 1<sup>st</sup> 2019, your M5000-3 unit with bear lid passed the captive bear test for bear-resistant products at the BC Wildlife Park in Kamloops, British Columbia. During the duration of this test your bin was not breached and therefore withstood the forces exerted by 60 minutes of black bear contact time. The M5000-3 unit with bear lid is therefore certified black bear resistant.

If there are any questions you may have regarding the testing please do not hesitate to contact us.

Thank you for participating,

**Vanessa Isnardy,**  
Provincial Coordinator,  
WildSafeBC

**Tracy Reynolds**  
Animal Care Supervisor,  
BC Wildlife Park

**Glenn Grant,**  
General Manager,  
BC Wildlife Park
